

Top 100 skills, sorted by job.

Two honest limits. The counts are rounded, and they come from one community site rather than from Anthropic itself. And a big number only means people installed it. Run one on real work before you trust it.

Start with the group that matches your problem, not with the top of the list. Every skill shows how many people installed it, and where that puts it against the other ninety-nine. The most installed comes first inside each group. The full running order is on the last sheet.

THE TEN GROUPS

GROUP	WHAT IT COVERS	HOW MANY	WHERE
NEEDS NOTHING TECHNICAL			
Get me found	Being seen, being chosen, being bought from.	14 skills	SHEET 1
Make me a video	From a script, a photo pile, or a press release.	11 skills	SHEET 2
Make it look good	Pages, colours, type, movement.	11 skills	SHEET 3
Say it better	Shorter, clearer, or written for you.	9 skills	SHEET 4
Think it through	Before anybody builds anything.	8 skills	SHEET 5
Find it out	Go and get the facts.	4 skills	SHEET 6
FOR PEOPLE BUILDING SOFTWARE			
Build it	The actual making, in whatever you build with.	15 skills	SHEET 6
Check it before I ship	Find the faults while they are still cheap.	10 skills	SHEET 8
Tidy the mess	What is already there, made orderly and quick.	9 skills	SHEET 9
Wire it together	Logins, payments, and one thing talking to another.	9 skills	SHEET 10
The full running order	All one hundred, most installed first.	100 skills	SHEET 12

HOW A SKILL EARNED ITS PLACE

- A public project with a named owner behind it.
 - The owner is the maker itself, or somebody the field follows.
 - An install count on the skill's own page, read that day.
- No figure from a league table, and none from a blog.
 - Nothing that only repeats something already here.
 - Nothing from a pack where every skill shows the same number.

Pick one. Run it on real work today.

Ten groups. Start with your problem.

Get me found.

Being seen, being chosen, being bought from.
